REYANSH SHARMA

AI Engineer | Generative AI

Delhi, India | +91 9034221896 | reyanshsharma3103@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Engineer with a strong foundation in Python, Machine Learning, Deep Learning, Natural Language Processing (NLP), and Generative AI. Experienced in building intelligent applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, and AI APIs. Skilled in developing AI-powered chatbots, voice assistants, and document intelligence systems using Google Gemini API and Groq API, with a focus on scalable, real-world AI solutions.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL, JavaScript
Web Technologies: HTML5, CSS3, JavaScript
Artificial Intelligence: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI
Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, LangChain
Frameworks & Libraries: FastAPI, Scikit-learn, NumPy, Pandas, Matplotlib
Databases: MySQL
APIs: Google Gemini API, Groq API, REST APIs
Tools & Technologies: Git, GitHub, Docker, VS Code

EXPERIENCE

Personal & Academic Projects

- Built and deployed AI-powered applications end-to-end using Python, LangChain, Google Gemini API, and Groq API.
- Designed RAG pipelines covering document parsing, text chunking, and semantic retrieval for document question answering.
- Applied prompt engineering and conversation context management to improve the quality of LLM responses.
- Worked independently through the full development cycle: planning, building, testing, and iterating on each project.

PROJECTS

AI-Powered PDF Chatbot

Python | RAG | LangChain | Google Gemini API

- Developed a RAG-based AI chatbot capable of uploading multiple PDF documents and providing accurate document-based question answering.
- Integrated Google Gemini API for contextual reasoning, summarization, and conversational responses.
- Implemented document parsing, text chunking, semantic retrieval, table extraction, and image understanding.
- Designed a responsive interface with multiple PDF upload support, conversation history, and dark/light mode.

JARVIS AI Voice Assistant

Python | Groq API | Automation

- Developed an AI-powered desktop voice assistant using Python and Groq API.
- Integrated speech recognition, text-to-speech, browser automation, and desktop application control.
- Automated web search, system commands, and AI-powered conversations through natural voice interaction.

Auto Reply AI Chatbot

Python | Google Gemini API | Prompt Engineering

- Built an AI chatbot capable of generating intelligent, context-aware replies using Google Gemini API.
- Improved response quality through prompt engineering and conversation context management.
- Developed a responsive chat interface with real-time AI-generated responses.

EDUCATION

Bachelor of Technology in Computer Science Engineering - Specialization: Artificial Intelligence and Machine Learning

St. Andrews Institute of Technology and Management, Gurgaon, India | Graduation: 2026

Percentage: 75%

CERTIFICATIONS

- IBM Web Development
- IBM DevOps
- AWS Prompt Engineering
